📁 PROFESSIONAL EXPERIENCE

Full-Stack Developer

NewProWeb (Outsource for PIN AG, Germany) 📍

December 2024 – Present

Rebuilt and optimized PIN AG's user portal, a platform for one of Germany's largest private postal and logistics companies. Transformed an unstable system into a reliable, performant application serving thousands of business customers.

- Developed e-commerce functionality including shopping cart, checkout flow, and dynamic pricing engine that calculates costs based on delivery distance, package weight, and transport method
- Increased system performance through Redis caching, optimized images, and efficient resource loading
- Reduced network load by restructuring API calls and introducing parallel request handling
- Refactored major frontend and backend components to remove technical debt

Technologies: TypeScript, Next.js, Express.js, Zustand, Tailwind, Redis, Strapi, Docker, PostgreSQL.

Frontend Mentor

Najot Ta'lim 📍

November 2023 – January 2025

Taught frontend development to students with no prior experience, guiding them from basic computer literacy and foundational math to job-ready skill level.

- Collaborated with the Study Department and teaching methodists to test and refine teaching approaches
- Observed instructors' classes and provided structured feedback for improvement
- Became a key support person for new teachers
- Wrote technical lesson plans used as part of the bootcamp's main curriculum

Technologies: JavaScript, TypeScript, React, Redux, Git

Frontend Developer

Abutech

August 2021 – August 2022

Developed the frontend for a commercial food delivery web application using React, Redux, and GraphQL. Took ownership of UI implementation and became the primary frontend resource on the team.

- Developed and maintained the majority of the frontend codebase using React
- Resolved performance issues and complex responsive design challenges
- Mentored interns and helped integrate them into the development workflow
- Collaborated with backend engineers and designers to deliver features and meet project deadlines

Technologies: React, Redux, GraphQL, Material-UI
